CONTENTS

I. PROCUREMENT POLICY

1. Procurement Policy

The Council will strive to attain best value for all goods, materials and services which it purchases. "Best Value" will be defined as a balance of price, quality of product and supplier services.

The Council will operate a transparent procurement process in accordance with its Financial Regulations and Standing Orders for Contract.

- The Council will purchase locally wherever possible and where best value can be satisfied.
- In evaluating "best value", the past record of the supplier will be taken into account.
- For goods, materials or services over £25,000, an evaluation model will be developed in advance against which best value can be judged.
- For other than small value purchases, the environmental and social credentials of the supplier will be requested, in accordance with the Council's Environmental Policy, and Community and Social Policy.
- The Council will purchase Fair Trade goods where possible
- The Council will purchase re-cycled goods or less environmentally damaging materials where they meet the required functional standard.
