

Report Statement

Report Purpose:
WIFI Figures

Author:
Communications Officer

Figures for September and October have unfortunately continued the decline shown at the last committee meeting. May was the last time we saw figures over 27k wifi connections. September continued the decline from August and is just over 20k which reflects the drop in footfall figures.

We do have the wifi report for October which does show a slight uptick, and hopefully this will be reflected in the footfall when we receive them.
