Notice Boards for the indoor market.

We are in the process of investigating the best quote for these, ideally from somewhere local. Whilst this was considered one of the easier tasks as part of the signage project, as we have not yet heard from Cheshire East Council regarding the feasibility study on the Indoor Market. We are hesitant to go ahead and design/produce maps, which may change imminently depending on the consultants recommendations. There is also the public toilet that the town council are pursuing with Cheshire East to factor in.

The archway for the Castle Quarter

This project is progressing. The Town Centre Manager has received quotes from two local businesses for a bespoke arch and needs to provide further measurements for a third. The design has taken into consideration that requesting permission from landlords will be complicated and time consuming, so the arch will be free standing, fixed into the road way at the top of Backwallgate which has no access to vehicles. In addition, the Town Centre Manager has started to make enquiries with the proposed buildings where we would like to see the hanging signs situated.
